Job Title: Dot Net Developer

We are looking for a passionate and skilled **Dot Net Developer** to join our innovative development team. The ideal candidate should have a keen interest in building dynamic web applications and a willingness to learn and grow in a collaborative environment. As a developer, you will work on both frontend and backend technologies, contributing to creating scalable and responsive solutions using **Angular** and **.NET**.

Responsibilities:

- Assist in developing and maintaining web applications using **Angular** for the frontend and **.NET** for the backend.
- Collaborate with senior developers, designers, and product teams to understand requirements and implement solutions.
- Develop APIs and integrate them with frontend systems to ensure smooth communication.
- Implement responsive and user-friendly web interfaces, adhering to UI/UX best practices.
- Participate in testing and debugging to ensure the quality, scalability, and performance of applications.
- Work with version control systems like Git for code management.
- Stay updated on the latest tools and technologies in full-stack development.

Requirements:

- **Education:** Bachelor's degree in Computer Science, Information Technology, or a related field.
- **Experience:** 1.5 – 5 Years of experience in software development, preferably as a Full-stack or Dot Net Developer.

SOFTWARE SOLUTION PVT.LTD

- **Technical Skills:**

- Basic knowledge of the **.NET framework (ASP.NET Core)** for backend development.
- Familiarity with **Angular (Angular 12+), TypeScript, HTML5, CSS3, and JavaScript** for frontend development.
- Understanding of RESTful APIs and database concepts (e.g., SQL Server).
- Exposure to frontend build tools like Angular CLI or Webpack (a plus).

- **Soft Skills:**

- Strong problem-solving skills and attention to detail.
- Ability to communicate effectively with team members and stakeholders.
- Enthusiasm for learning new technologies and improving your skillset.
