NIOTECHONE
SOFTWARE SOLUTION PVT.LTD

Job Title: QA Tester

We are seeking a dedicated and detail-oriented Quality Assurance (QA) Tester to join our team. As a QA Tester, you will play a crucial role in ensuring the quality and reliability of our software products through manual and automated testing. Your excellent communication skills will aid in effective collaboration with developers, product managers, and other stakeholders to deliver high-quality products that meet business needs.

As a QA Tester, you will be responsible for identifying and documenting defects, working closely with the development team to resolve issues, and ensuring that software meets both functional and non-functional requirements.

Responsibilities:

- Collaborate with product managers, developers, and designers to understand project requirements and ensure comprehensive test coverage.
- Design, create, and execute test plans and test cases based on functional and technical requirements.
- Perform manual testing to identify software defects and report issues in a clear and concise manner.
- Conduct automated testing to validate the performance, functionality, and reliability of applications.
- Perform regression, integration, and system testing to ensure new and existing functionalities work as expected.
- Work closely with the development team to troubleshoot, replicate, and resolve issues.
- Participate in sprint planning and daily stand-ups, providing input on potential risks and quality concerns.
- Ensure that software is compliant with quality standards, including security, performance, and usability.
- Stay updated with the latest testing tools, methodologies, and best practices to continuously improve testing processes.

Requirements:

- 6 Months – 1.5 Years of experience in software quality assurance.

- Proven experience in manual testing; exposure to automation testing is a plus.
- Solid understanding of the software development life cycle (SDLC) and QA methodologies.
- Familiarity with bug tracking and test management tools.
- Strong analytical and problem-solving skills.
- Good communication skills to clearly articulate issues and feedback.
- Attention to detail and a proactive approach to identifying potential issues.
- Ability to work collaboratively in a fast-paced, team-oriented environment.
- Basic knowledge of programming and scripting is an advantage.

Required Experience: 6 Months – 1.5 Years
No. of Positions: 1
